Subject: RE: Facility Assistance Request.

Roxanne,

Organic peroxide: 38,000 lbs. per trailer and 8 trailers (refrigerated) and Approximately 1 million lbs. "Ambient" organic peroxide.

Chlorine: 3 100lb cylinders

SO2: 6000 lbs.

Site contact: Plant Manager, Leslie Comardelle, on site is 504-450-7265.

Mark Heldt, Director of Manufacturing (he's in Pennsylvania) Cell 610-299-0926.

New problem: One of the trailers is starting to float. See attached picture. That building is the one that stores all of the ambient organic peroxide. The facility is currently on the phone with the Harris County OEM discussing the situation.

The facility is also requesting 10,000lbs of dry ice to help with the cooling.

Thanks,

Jesse (Jay) LeGros Jr.

Jay,

Any ideas how big the tank is holding the chemical

Subject: Facility Assistance Request.

Roxanne,

Well the situation has hit the news this morning. Mr. Lolli advised that the facility has been working with Harris County OEM, Crosby Fire Dept., PSA's, etc.. The fire department did send a boat last night to the site to assess the situation. Nothing was done at that time. One of the ride out crew did decide to return home with the fire department.

The facility is still accessing the situation as 3 of their reefer trucks with organic peroxide are "about to go". The site is trying to determine the overall consequence of the situation. They are trying to determine if the worst case scenario would be just a local event (the site) or if it could affect a larger area.

I'll let you know if I find out anything more.
